PERSONAL STATEMENT

Agricultural engineer specialising in UAV and sensor based high throughput phenotyping for cereal and row crops. Builds multispectral and hyperspectral imaging and vegetation index pipelines, self supervised and hybrid deep learning models for crop stress and yield trait detection, and reproducible, uncertainty aware machine learning workflows integrated with GIS, satellite remote sensing, and crop simulation models.

EDUCATION AND TRAINING

Erasmus Mundus Joint Master's Degree (EMJMD), Sustainable Agriculture 2025 to 2027

Public University of Navarre, Spain / UTAD, Portugal / Agricultural University of Athens, Greece

BEng (Hons), Agricultural and Bioresources Engineering, First Class 2019 to 2024

Ahmadu Bello University, Zaria, Nigeria. CGPA 4.77/5.00, ranked top 1% of cohort

National Diploma, Agricultural Engineering Technology, Distinction 2016 to 2018

Division of Agricultural Colleges, ABU Zaria. CGPA 3.78/4.00, ranked top 1%

EMJMD Research Scholar (Mobility Track) Sep 2026 to Jan 2027

Agricultural University of Athens, Greece

- Term 3 focus: efficient water use, smart irrigation (30 ECTS). Courses: Modelling Crop Water Requirements, Smart Design and Management of Irrigation Systems, Modelling for Sustainable Irrigation, Agri-environmental Legislation and Policies, Technology Sharing and Transfer for Entrepreneurship, Practical Exercise Integrating Disciplines III.
- Continued graduate level research training in smart design and management of irrigation systems.
- Accomplished a complete farm level irrigation and crop growth decision support tool, as measured by successful four step simulation (canopy, transpiration, biomass, yield) across five smallholder crops, by engineering NaCROP, a modular Python/Tkinter pipeline for evapotranspiration, soil water balance, and irrigation scheduling around Zaria, Nigeria. [Code](#)

Summer Intern, Computer Vision Group

Jun 2026 to Aug 2026

Dept. of Computer Engineering, ABU, Zaria

- Accomplished cross condition transfer of crop disease recognition models, as measured by 64.4 percent classification accuracy (macro AUC 0.882 against a 5.3 percent chance baseline) across 19 disease classes on 1,543 field images, by extending the Geometry Agnostic Contrastive Learning (GACL) framework with four new geometry invariant neural components. First author paper under review at Biosystems Engineering, Elsevier. [Code](#)

EMJMD Research Scholar (Mobility Track)

Feb 2026 to Jun 2026

UTAD, Portugal

- Term 2 focus: precision agriculture for sustainable crop production (30 ECTS). Courses: Precision Agriculture, Identifying Soil and Crop Variability, Precision Agriculture Machinery, Preventive Management Strategy, Reactive Management Strategy, Practical Exercise Integrating Disciplines II.
- Accomplished cross system precision agriculture prediction and input cost reduction, as measured by R squared between 0.978 and 0.995 for grape ripening and maize yield regressions and a 2.69 tonne cut in lime demand, by integrating GIS, remote sensing, and machine learning pipelines across more than 65 hectares of Portuguese trial sites. [Code](#)
- Accomplished more reliable soil nutrient and yield mapping, as measured by a roughly 20 percent reduction in residual kriging uncertainty across 17,864 samples on a 16.85 hectare maize field, by developing Multitask Singularity Regression Kriging (MSRK). [Code](#)
- Accomplished predictive harvest date forecasting for grape ripening, as measured by R squared of 0.9784, by building an NDVI and logarithmic regression model from field must samples at a six hectare UTAD vineyard, Quinta de Nossa Senhora de Lurdes, Vila Real. [Code](#)
- Accomplished a costed, spatially targeted pest management programme, as measured by a sized pheromone diffuser plan across 11 grape variety blocks, by running terrain characterisation and a 25 trap monitoring network for grape moth across a 42.97 hectare Douro vineyard estate. [Code](#)

EMJMD Research Scholar (Mobility Track)

Sep 2025 to Jan 2026

Public University of Navarre, Spain

- Term 1 focus: technological bases for agricultural sustainability (30 ECTS). Courses: Data Science and Analytics in Agriculture, Geospatial Data Analysis, Geoinformation and Remote Sensing, Sensors and the Internet of Things, Agricultural Systems Modelling, Practical Exercise Integrating Disciplines I.
- Accomplished real time, field deployable crop health screening, as measured by 33.8 percent balanced accuracy against a 4.55 percent chance baseline, by building a fourteen module open source pipeline for RGB/multispectral vegetation indexing, GLCM texture analysis, and CNN/Faster R-CNN inference. [Code](#)
- Accomplished radiometrically consistent multi temporal vegetation monitoring, as measured by a 39 and 31 percent reduction in temporal NDVI variance for water and rooftop reference targets, by designing STADOS, a five stage adaptive dark object subtraction framework validated on real Sentinel 2 imagery. [Code](#)

- Accomplished accurate land suitability mapping for livestock slurry application, as measured by RMSE of 7.78 and R squared of 0.77 on a held out set of 127 sites, by building a two layer GIS and regression kriging pipeline across 550 observations over 14.35 square kilometres near Tudela, Spain. [Code](#)
- Accomplished a 47.8 percent reduction in annual soil loss, by building a Bayesian grounded digital twin combining hydrological, hydraulic, and hybrid CNN-BiLSTM-attention sediment models (hold out R squared of 0.90) for gully erosion control. [Code](#)
- Built a six notebook vector/raster GIS and Sentinel 1/2 remote sensing course package in Python and Google Earth Engine. [Code](#)

Undergraduate Project Assistantships

Mar 2024 to Mar 2025

Depts. of Agricultural and Bioresources Engineering and Animal Science, ABU

- Contributed data collection, statistical analysis, and literature review across concurrent undergraduate research projects spanning water and irrigation systems, soil and erosion assessment, and postharvest and animal systems.

Project Assistant (Remote Data Lead), Smart Greenhouse Automation

2024 to 2025

IAR-ABU, Nigeria

- Automated greenhouse environmental control by engineering adaptive irrigation scheduling algorithms fusing real time soil moisture and microclimate telemetry.

Student Research Assistant, Precision Crop Systems

2022 to 2024

NAERLS, Nigeria

- Trained and validated CNN based crop stress detection models reaching 78 percent classification accuracy on multispectral UAV imagery; automated UAV flight path planning.

Assistant Farm Manager (concurrent, part time)

2022 to 2024

Yankari Nasarawa Farms, Nigeria

- Sustained animal welfare and operational efficiency across a commercial poultry facility by managing automated climate control and water dosing systems.

Project Assistant, Smart Irrigation and Water Systems

2021 to 2022

BOMO Basin Project, Nigeria

- Automated water delivery across a one hectare smart drip irrigation array by implementing closed loop control logic.

Research Intern

2017 to 2020

NCAM, Ilorin and IAR, Zaria, Nigeria

- Benchmarked mechanisation efficiency of locally engineered machinery via Python data logging pipelines; supported baseline hydrological research.

LEADERSHIP AND VOLUNTEERING

Undergraduate Course Tutor 2020 to 2024

ABU Zaria (NAMET), Nigeria

- Ran supplementary tutorials in Differential Equations and Transforms, Irrigation System Design, and Computer Applications in Agricultural Engineering.

Secretary General, NAAESB 2023 to 2024

National Assoc. of Agric. Engineering Students

- Directed operational targets and inter chapter scientific meetups for the national student body.

Deputy Coordinator 2020 to 2025

KOJYAF, Zango Shanu, Zaria

- Coordinated tutorial and mentorship programmes preparing secondary students for JAMB entrance examinations.

Director, Environmental Protection Agency 2023 to 2024

ABU Students' Union Government

- Directed campus environmental protection and sanitation initiatives.

Physics and Mathematics Teacher 2022 to 2023

Takai Academy, Zaria, Nigeria

- Instructed senior classes in classical physics and computational principles.

PERSONAL SKILLS

Geospatial AI / GIS	QGIS, ArcGIS, ENVI, Google Earth Engine, Sentinel imagery, UAV imaging
Machine Learning	PyTorch, TensorFlow, Keras, scikit-learn, CNNs, self supervised learning
Crop Modelling	APSIM Next Generation, crop growth simulation
Climate AI	CMIP6, ERA5, ACCESS-S2, downscaling and forecasting
3D Computer Vision	COLMAP, Open3D, Pix4D, Agisoft Metashape
Programming	Python, MATLAB, R, Git/GitHub, Zenodo

CONFERENCES AND WORKSHOPS

Digital Agroecology Cluster Conference (EU funded), Brussels (2025); Vibrational Spectroscopy and Chemometrics in Agro Food Systems (EU funded) (2025); IEEE AgriTech, Valencia, Spain (2024); 6th African Regional Conference on Irrigation and Drainage (2025); Mechanistic Modeling of Rainfall Driven Soil Solute Transport, University of Florida (2025); NAERLS Technical Seminar Series (2023).

AWARDS AND HONOURS

Erasmus Mundus Joint Master Scholarship, European Union (2025); Best Project Award, ABU Senate (2024); Best Graduating Student, Agricultural and Bioresources Engineering (2024); Nigerian Federal Government Award for Academic Excellence (2024); Best Undergraduate Research Paper Award, ABU (2024); Best 300 Level Student, ABU (2022); Best 200 Level Student, ABU (2021); Award of Merit as Tutor, Faculty of Engineering, ABU (2021); Best Graduating Student, National Diploma, Samaru College of Agriculture (2019); PTDF Undergraduate Fellow (2023); Needs Based University Fellowship (2022).

PROFESSIONAL MEMBERSHIPS

American Society of Agricultural and Biological Engineers (ASABE); Nigerian Institution of Agricultural Engineers (NIAE); Nigerian Society of Engineers (NSE); Pupil Engineer, COREN.
