DETAILS

Location: Pamplona, Spain

Nationality: Nigerian

EDUCATION

2025 to 2027

EMJMD, Sustainable Agriculture (SUSTAGRI)

UPNA, UTAD, AUA

2019 to 2024

B.Eng, Agric. and Bioresources Engineering

ABU, Nigeria. First Class Honours, CGPA 4.77 of 5.00, Top 1 percent

2016 to 2018

National Diploma, Agric. Engineering Technology

ABU. Distinction, CGPA 3.78 of 4.00, Top 1 percent

SKILLS

Python / Deep Learning

GIS and Remote Sensing

Computer Vision

Geostatistics

Agric. Machinery Systems

MATLAB / R

LANGUAGES

English (fluent)

MEMBERSHIPS

ASABE, NIAE, NSE, Pupil Engineer
COREN

Naziru Halilu

DIGITAL AGRICULTURE · COMPUTER VISION · GEOSPATIAL MACHINE LEARNING

PROFILE

Agricultural engineer with a long term research focus on the digitalization of agriculture, spanning computer vision, geospatial machine learning, agricultural control systems, and high throughput phenotyping, grounded in a strong foundation in agricultural machinery, mechanization, and farm power systems.

EMPLOYMENT HISTORY

EMJMD Research Scholar

Sep 2026 to Jan 2027

Agricultural University of Athens, Greece

- Term 3 focus: efficient water use, smart irrigation (30 ECTS). Courses: Modelling Crop Water Requirements, Smart Design and Management of Irrigation Systems, Modelling for Sustainable Irrigation, Agri-environmental Legislation and Policies, Technology Sharing and Transfer for Entrepreneurship, Practical Exercise Integrating Disciplines III.
- Continued graduate level research training in smart design and management of irrigation systems.
- Built NaCROP, a modular Python/Tkinter pipeline for evapotranspiration, soil water balance, irrigation scheduling, and a four step crop growth simulation for five smallholder crops around Zaria, Nigeria. [Code: GitHub](#)

Summer Intern, Computer Vision Group

Jun to Aug 2026

Dept. of Computer Engineering, ABU, Zaria

- Accomplished cross condition transfer of crop disease recognition models, as measured by 64.4 percent classification accuracy (macro AUC 0.882 against a 5.3 percent chance baseline) across 19 disease classes on 1,543 field images, by extending the Geometry Agnostic Contrastive Learning (GACL) framework with four new geometry invariant neural components. First author paper under review at Biosystems Engineering, Elsevier. [Code: GitHub](#)

EMJMD Research Scholar

Feb to Jun 2026

UTAD, Portugal

- Term 2 focus: precision agriculture for sustainable crop production (30 ECTS). Courses: Precision Agriculture, Identifying Soil and Crop Variability, Precision Agriculture Machinery, Preventive Management Strategy, Reactive Management Strategy, Practical Exercise Integrating Disciplines II.
- Accomplished cross system precision agriculture prediction and input cost reduction, as measured by R squared between 0.978 and 0.995 for grape ripening and maize yield regressions and a 2.69 tonne cut in lime demand. [Code: GitHub](#)
- Accomplished more reliable soil nutrient and yield mapping via Multitask Singularity Regression Kriging (MSRK), as measured by a roughly 20 percent reduction in residual kriging uncertainty across 17,864 samples. [Code: GitHub](#)
- Accomplished predictive harvest date forecasting for grape ripening, as measured by R squared of 0.9784, at a six hectare UTAD vineyard. [Code: GitHub](#)
- Accomplished a costed, spatially targeted pest management programme for grape moth across a 42.97 hectare Douro vineyard estate. [Code: GitHub](#)

EMJMD Research Scholar

Sep 2025 to Jan 2026

Public University of Navarre, Spain

- Term 1 focus: technological bases for agricultural sustainability (30 ECTS). Courses: Data Science and Analytics in Agriculture, Geospatial Data Analysis, Geoinformation and Remote Sensing, Sensors and the Internet of Things, Agricultural Systems Modelling, Practical Exercise Integrating Disciplines I.
- Accomplished real time, field deployable crop health screening, as measured by 33.8 percent balanced accuracy against a 4.55 percent chance baseline, by building a fourteen module RGB/multispectral vegetation indexing pipeline. [Code: GitHub](#)
- Accomplished radiometrically consistent multi temporal vegetation monitoring, as measured by a 39 and 31 percent reduction in temporal NDVI variance, by designing STADOS, a five stage adaptive dark object subtraction framework. [Code: GitHub](#)
- Accomplished accurate land suitability mapping for livestock slurry application, as measured by RMSE of 7.78 and R squared of 0.77 across 14.35 square kilometres near Tudela, Spain. [Code: GitHub](#)
- Accomplished a 47.8 percent reduction in annual soil loss via a Bayesian grounded digital twin for gully erosion biocontrol, hold out R squared of 0.90. [Code: GitHub](#)
- Built a six notebook vector/raster GIS and Sentinel 1/2 remote sensing course package in Python and Google Earth Engine. [Code: GitHub](#)

Undergraduate Project Assistantships

Mar 2024 to Mar 2025

ABU, Nigeria

- Contributed data collection, statistical analysis, and literature review across concurrent research projects in water and irrigation systems, soil and erosion assessment, and postharvest and animal systems.

Naziru Halilu

Digital Agriculture Researcher

RESEARCH IMPACT

- 14 Open repositories
- 14 Zenodo DOIs archived
- 4 Peer reviewed papers
- 6 Under review
- 10 Awards and honors

ORGANIZATIONS

- Agricultural University of Athens
- UTAD, Portugal
- Public University of Navarre
- Ahmadu Bello University (ABU)
- IAR-ABU
- NAERLS
- Yankari Nasarawa Farms
- BOMO Basin Project
- NCAM, Ilorin
- Takai Academy

CERTIFICATES

- EMJMD certificate / enrolment
- B.Eng transcript / certificate
- ND transcript / certificate

Project Assistant, Remote Data Lead 2024 to 2025
IAR-ABU, Nigeria

- Engineered adaptive irrigation scheduling algorithms fusing real time soil moisture and microclimate telemetry for automated greenhouse control.

Student Research Assistant, Precision Crop Systems 2022 to 2024
NAERLS, Nigeria

- Trained and validated CNN crop stress detection models reaching 78 percent accuracy on multispectral UAV imagery.

Assistant Farm Manager (part time) 2022 to 2024
Yankari Nasarawa Farms, Nigeria

- Managed automated climate control and water dosing systems for a commercial poultry facility.

Project Assistant, Smart Irrigation and Water Systems 2021 to 2022
BOMO Basin Project, Nigeria

- Implemented closed loop control logic for a one hectare smart drip irrigation array.

Research Intern 2017 to 2020
NCAM, Ilorin and IAR, Zaria, Nigeria

- Built Python data logging pipelines to benchmark mechanization efficiency; supported baseline hydrological research.

TEACHING, LEADERSHIP AND COMMUNITY ENGAGEMENT

Undergraduate Course Tutor 2020 to 2024
ABU Zaria (NAMET)

- Supplementary tutorials in Differential Equations and Transforms, Irrigation System Design, and Computer Applications in Agric. Engineering.

Secretary General, NAAESB 2023 to 2024
National Assoc. of Agric. Engineering Students

- Directed operational targets and inter chapter scientific meetups for the national student body.

Director, Environmental Protection Agency 2023 to 2024
ABU Students' Union Government

- Directed campus environmental protection and sanitation initiatives.

Deputy Coordinator 2020 to 2025
KOJYAF, Zango Shanu, Zaria

- Coordinated tutorial and mentorship programs preparing secondary students for JAMB entrance examinations.

Physics and Mathematics Teacher 2022 to 2023
Takai Academy, Zaria, Nigeria

- Instructed senior classes in classical physics and computational principles.
